DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 4/03/2006 has been considered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is not clear, whether the applicant trying to claim a vehicle or an A.C dynamo or an engine.

Regarding claim 2, it is not clear, whether the applicant want to recite a control method of the engine or some thing else.

Regarding claim 3, It is unclear, what is the limitation of the claim, whether the claim recite a structure of the vehicle or the structure that control the vehicle.

Regarding claim 4, it is unclear, whether the applicant wants to claimed the structure that achieves the running situation of a vehicle or the control for controlling the motor.

Regarding claim 5, it is unclear, whether the claim recites a device that detect a rotational speed of each wheel of the vehicle.

5. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-5 are best understood rejected under 35 U.S.C. 102(b) as being anticipated by Kawamura (5,881,59).

Kawamura in figures 1-12, discloses a hybrid vehicle comprising an engine (1), an AC motor (7), a controller (6). The motor is connected to wheel (9) by a gear exchange. The engine drives the motor using alcohol fuel for reduce pollution. The controller controls a speed of the vehicle and keeps a safety for the running vehicle.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson et al. disclose a solid brush current collection system; Yang discloses a differential coupling and compound power system for a vehicle.
